**FOR IMMEDIATE RELEASE**

**IRONSHORE ENVIRONMENTAL OFFERS PRODUCTS POLLUTION COVERAGE  
ENHANCEMENT TO BROADEN *SPILLS* PROGRAM**

**New York, New York, June 6, 2019** – Ironshore Environmental is offering an enhancement to its Site Pollution Incident Legal Liability Select (*SPILLS*) policy to broaden its coverage for manufacturers and distributors, as well as other entities with products exposure. The Ironshore *SPILLS* policy provides comprehensive environmental liability protection enabling insureds to manage a variety of environmental exposures. This new *SPILLS* policy endorsement extends coverage for pollution incidents caused by the insured’s product after that product has been put to its intended use, helping to fill policy coverage gaps, which exclude bodily injury, property damage and cleanup arising from a product.

Ironshore’s *SPILLS* program provides coverage for pollution incidents for a broad definition of pollutants, including hazardous materials, petroleum products, mold, legionella and other contaminants. The *SPILLS* policy covers first and third party on-site and off-site remediation expenses, third party bodily injury and property damage caused by pollution incidents, transportation pollution and waste disposal liability. This new *SPILLS* policy enhancement goes beyond where many other site pollution programs end by covering products pollution liability for industries with that exposure. Coverage is being offered as claims-made and reported coverage, which can be offered to both new and existing insureds. Limits are available from \$1 million and up to \$50 million.

“Ironshore Environmental recognizes the ever-present and increasing risk of unexpected and potentially costly pollution incidents leading to litigation and environmental enforcement actions,” said Toby Smith, President of Ironshore Environmental. “Our new endorsement now broadens protection for insureds with pollution exposure associated with their products.”

Ironshore Environmental introduced the *SPILLS* insurance program more than ten years ago, providing a suite of asset class-specific protection for complex pollution exposures faced by high profile global industry sectors. Ironshore’s *SPILLS* policy provides customized coverage solutions to address and respond to environmental risk exposures for the Educational, Healthcare, Hospitality, Real Estate, Oil & Gas and Manufacturing sectors.
